

# Online Pre-order System for Northwind Bakery

---

## Where things stand

You run a 12-person bakery chain, and your current website is acting as a digital brochure rather than a storefront. Customers cannot place orders ahead of time for pickup.

This means you are missing out on steady pre-order revenue and spending too much time taking orders over the phone or at the counter. With around 60 items on your menu, you need a system that handles product variations smoothly without adding friction for your staff or your customers.

---

## What success looks like

When this project is complete, your bakery will have a reliable online ordering channel running smoothly.

- Customers can browse your full menu and place pickup pre-orders directly on your website.
  - Your staff can easily manage incoming orders, prep schedules, and inventory through a simple interface.
  - All 60 menu items are accurately listed with correct pricing and descriptions.
  - Two of your team members are fully trained to update products and manage daily orders independently.
- 

## Scope of work

**Shopify setup** We will configure a clean, fast Shopify store tailored for food and bakery pickup.

**Menu migration** We will import and format your catalog of approximately 60 items, including descriptions and prices.

**Pickup logic** We will set up location-based scheduling so customers can choose their pickup time and store.

**Staff training** We will run two hands-on sessions to train your team on order fulfillment and menu updates.

### Not included

- Custom photography for your menu items.
  - Advanced custom software integrations beyond standard Shopify applications.
- 

## Approach & timeline

**Setup & Discovery · Week 1** We review your menu structure, establish your store preferences, and outline the exact pickup rules for your locations.

**Build & Migration · Weeks 2 to 4** We build the Shopify store, configure the checkout and pickup scheduling, and migrate all 60 items into the system.

**Testing & Refinement · Week 5** We test the end-to-end ordering process with your team, run test transactions, and refine the workflow.

**Training & Launch · Week 6** We train your two designated staff members, hand over the documentation, and launch the site to the public.

---

## Investment

This fixed investment covers the complete design, build, migration, and training needed to launch your new pre-order system within six weeks. Payment is due in full upon acceptance of this proposal.

|                                                                                       |                |
|---------------------------------------------------------------------------------------|----------------|
| <b>Shopify Store Build &amp; Pickup Setup</b>                                         | \$4,500        |
| Complete setup of the online store, checkout flow, and pickup scheduling logic.       |                |
| <b>Menu Migration</b>                                                                 | \$2,500        |
| Formatting and importing approximately 60 bakery items with descriptions and pricing. |                |
| <b>Staff Training &amp; Launch Support</b>                                            | \$1,500        |
| Hands-on training sessions for two team members and live support during launch week.  |                |
| <b>Total</b>                                                                          | <b>\$8,500</b> |

---

## Terms

- This proposal is valid for 14 days from the date of issue.
- Payment is due in full upon acceptance.
- Two rounds of revisions are included for design and layout elements.
- Full ownership and intellectual property of the store transfer to you upon receipt of final payment.
- Either party may cancel the project with written notice, with payment adjusted for work completed up to that point.
