

Northwind Bakery Online Ordering

Where things stand

You run a growing 12-person bakery chain, and your current website serves as an online menu rather than a shop. Customers cannot place orders in advance for local pickup.

That means phone orders and manual counters are taking up time that your team could spend baking. You need a reliable system that handles pre-orders smoothly so your staff can focus on the kitchen.

What success looks like

Here is what you will have in place when we finish the work:

- Customers can browse your full menu and pay for pickup orders directly on your website
 - Your entire catalog of roughly 60 items is organized cleanly with clear options
 - Two designated staff members know how to manage, fulfill, and update daily orders with confidence
 - The ordering flow matches your bakery's operating hours and pickup windows without confusion
-

Scope of work

Shopify setup We will configure a clean, fast Shopify store tailored for food pickup and local orders.

Menu migration We will build out your menu of about 60 items with accurate categories, descriptions, and pricing.

Staff training We will run two practical walkthrough sessions with your team so two staff members can manage daily orders easily.

Not included

- Custom point-of-sale hardware installation
 - Photography for menu items
 - Ongoing digital marketing or social media management
-

Approach & timeline

Discovery and Setup · Week 1 We map out your pickup rules, menu structure, and Shopify settings. You get a clear preview of the store foundation.

Build and Migration · Weeks 2-4 We load your menu items, test the checkout flow, and make sure orders route correctly. You review the functional site and test orders yourself.

Training and Launch · Weeks 5-6 We train your staff, run final tests, and make your online ordering live for customers.

Investment

This fixed investment covers the complete design, build, migration, and staff training needed to get your pre-ordering system live in six weeks. Payment is due in full on acceptance of this proposal.

Shopify Store Build & Design	\$3,500
Complete setup of the e-commerce store configured specifically for bakery pickup.	

Menu Migration	\$3,500
Structuring and uploading approximately 60 items with accurate options and categories.	

Staff Training & Launch Support	\$1,500
Training two staff members and ensuring a smooth go-live within six weeks.	

Total	\$8,500
--------------	----------------

Terms

- This proposal is valid for 14 days from today
- Payment is due in full upon acceptance
- Two rounds of revisions are included during the build phase
- You own all store data, domain, and intellectual property once final payment is made
- Either of us can cancel the project with written notice, and you only pay for work completed up to that point
