

Online Pre-order System for Northwind Bakery

Where things stand

You run twelve locations, but your current website cannot take online orders. Customers want to pre-order bread and pastries for pickup, but they have to call ahead or walk in.

This creates extra phone traffic for your staff and leaves revenue on the table. You need a reliable pre-order system that fits your existing daily operations without slowing down the bakery counter.

What success looks like

When this project is complete, you will have: - A live Shopify online store configured specifically for bakery pre-orders and local pickup - Your full menu of roughly 60 items migrated with correct descriptions, variants, and pricing - Clear pickup scheduling enabled so orders match your daily baking capacity - Two trained staff members who can manage orders and update products independently

Scope of work

Store Setup We will configure a clean Shopify store that matches your branding and works seamlessly on mobile phones and computers.

Menu Migration We will import your roughly 60 items, organizing them into clear categories with accurate modifiers, pricing, and availability.

Pickup Configuration We will set up location-based pickup rules and time slots so customers can only order what is ready when they arrive.

Staff Training We will run two hands-on training sessions and provide a simple written guide for daily order fulfillment.

Not included - Custom photography for menu items - Complex third-party inventory or POS integrations beyond standard Shopify functionality

Approach & timeline

Discovery and Design · Week 1 We review your menu structure and map out the customer pickup flow. You approve the core site layout before we build.

Build and Migration · Weeks 2–4 We build the Shopify store, import your 60 menu items, and configure the pickup rules. You test the ordering flow with sample purchases.

Testing and Training · Week 5 We run a dry run with your team, refine any remaining details, and train your two designated staff members.

Launch · Week 6 We point your domain to the new store, open pre-orders to the public, and provide on-call support for your first week of live orders.

Investment

This fixed-fee investment covers the complete design, build, menu migration, and staff training needed to launch your pre-order system in six weeks. Payment is due in full upon acceptance of this proposal.

Shopify Pre-order Setup & Design	\$3,500
---	---------

Complete setup of the e-commerce store optimized for bakery pickup.

Menu Migration	\$3,000
-----------------------	---------

Import and organization of approximately 60 items with variants and pricing.

Staff Training & Launch Support	\$2,000
--	---------

Hands-on training for two staff members and launch week assistance.

Total	\$8,500
--------------	----------------

Terms

- This proposal is valid for 14 days from today.
- Payment is due in full upon acceptance.
- Two rounds of revisions are included during the design and build phases.
- You own all site content, assets, and the Shopify account outright upon final payment.
- Either of us can cancel the project with written notice, with work paid for up to that point delivered to you.
