

Online Pickup Ordering for Northwind Bakery

Where things stand

Northwind runs a busy bakery with a 12-person team, but your current website cannot accept orders online. Customers who want to secure fresh bread or pastries before you sell out have to call in advance or visit the counter directly.

Handling phone orders during morning prep pulls your staff away from baking and counter service. You need a dedicated, reliable system for online pickup orders so regular customers can reserve items ahead of time and your team can focus on the bakery floor.

What success looks like

When this project is complete, you will have a clear, easy-to-use pickup ordering channel in place.

- Customers can browse your daily bakery menu and pre-order for pickup from their phones or computers.
 - Your counter staff receive organized, prepaid order lists each morning with zero phone interruptions.
 - Two designated team members can update daily menu availability, adjust pricing, and process orders on their own.
 - Your new ordering system launches cleanly within six weeks with no downtime for your existing web presence.
-

Scope of work

Store setup & pickup workflow We will configure a Shopify storefront tailored to your brand, including scheduled pickup time slots and customer notification emails.

Menu catalog migration We will format and input your full catalog of approximately 60 items, organizing them into clear categories with prices, product details, and daily cutoff limits.

Team training & documentation We will hold a hands-on training session for two staff members and provide a concise reference sheet covering daily order management and menu updates.

Not included

- Ongoing Shopify subscription fees or payment gateway processing rates
- Original photography or new product copy writing
- Local delivery routing or shipping setups

Approach & timeline

Phase 1: Setup & Design · Weeks 1–2 We set up your Shopify store, establish brand styling, and configure the in-store pickup rules for your review.

Phase 2: Menu Migration · Weeks 3–4 We upload your 60-item menu, set up item categories, and test order notification alerts.

Phase 3: Staff Training · Week 5 We conduct a live training session with two staff members and provide your daily operational reference guide.

Phase 4: Launch & Go-Live · Week 6 We point your domain to the new store, run end-to-end test transactions, and monitor live orders during your opening week.

Investment

This investment gives your bakery an automated revenue channel that reduces counter congestion and secures daily sales in advance. Payment is due in full upon acceptance so we can reserve your start date and launch within the six-week window.

Shopify Storefront Setup & Pickup Configuration	\$4,500
--	---------

Customization of a clean Shopify store with pickup scheduling and automated receipts.

Menu Catalog Migration (60 Items)	\$2,200
--	---------

Structuring, categorizing, and inputting up to 60 bakery items with prices and pickup settings.

Staff Training & Go-Live Support	\$1,800
---	---------

Direct training for two staff members, practical documentation, and launch week oversight.

Total	\$8,500
--------------	----------------

Terms

- **Validity:** This proposal is open for acceptance for 14 days from receipt.
- **Payment:** Full payment is due upon acceptance before project work begins.
- **Revisions:** Includes up to two rounds of minor adjustments during the design and menu review phases.
- **Ownership:** You retain full ownership of all store assets, accounts, and customer data once published.
- **Cancellation:** If you need to stop work before launch, we will provide a prorated refund based on work completed to date.
